A gray image, itself with a blue border, then with added red border to the image in Cewe editor

kk centred text with border gg

kk centred single text over multiple lines with border gg

A grey image, itself with a blue border, then with added red border to the image in Cewe editor

Non transparent yellow triangle above here, id 121605

55% transparent color clip above here, id 63488, a downloaded color clip

30% transparent color clip above here, id 63504, a standard color clip

A recolored clipart arrow, id 121285

White clipart in the back, down-loaded frame (passepartout) id 125186 on a snow picture. This shows that at least one instance of issue 55 now seems to work!
https://github.com/bash0/cewe2pdf/issues/55

Oma Edith ist zu Besuch um ihren Mio endlich in die Arme zu schließen

The FranklinGothic problem: The CEWE FG fonts are (a) badly formed (all of them have the same full font name) and (b) CEWE does not supply an FG italic font!
This resulted in our generated pdf inexplicably using FG bold italic where it should have used FG bold. I suspect an issue in the reportlabs font management. The "fix" is some improvement of loading of the fonts in our code (including better diagnostics) and to define the FranklinGothic font family by hand in cewe2pdf.ini, using the Windows FG italic font to take the place of the missing CEWE FG italic. But don't ask me why that fixes it.

FG Normal
FG Bold
FG Italic
FG Bold Italic

Arial
Arial Bold
Arial Italic
Arial Bold Italic

Balloon Caps

Harlow Solid Italic

The whole issue of "incomplete" font families is not clear. CEWE manages a full set of four from the single pecita.ttf font file, as shown below, while our code needs separate files for the four weights!

Pecita Book
Pecita Book bold
Pecita Book Italic
Pecita Book Bold Italic

https://github.com/bash0/cewe2pdf/issues/85

A (downloaded) black clipart (clipart="1134365") with the colour changed to red #df1900

A black clipart (clipart="129188") 14466-CLIP-EMBOSS-GD.xml with the colour changed to turquoise #54ddff. Tricky because fill is set to none and stroke is not set

The OpenType font .otf file problem: CEWE provides some fonts in OpenType files that we cannot handle. We try to fix that with a one-time conversion to ttf files. Here are some tests
https://github.com/bash0/cewe2pdf/issues/133

CEWE Head
CEWE Head Italic
CEWE Head Bold
CEWE Head Bold Italic

https://github.com/bash0/cewe2pdf/issues/153

This is the Crafty Girls font, downloaded from fonts.google.com. Does it get the right line spacing? Also when an explicit new line is used?

https://github.com/bash0/cewe2pdf/issues/182

Line spacing 1.2 is now honoured by our code with Arial
Line spacing 1.3 is now honoured by our code.
Line spacing 1.4 is now honoured by our code
Line spacing 1.0 is now honoured by our code.

Line spacing 1.0 is now honoured by our code with Bodoni
Line spacing 1.2 is now honoured by our code.
Line spacing 1.3 is now honoured by our code.
Line spacing 1.4 is now honoured by our code
