Oma Edith ist zu Besuch um ihren Mio  
endlich in die Arme zu schließen

The FranklinGothic problem: The CEWE FG fonts are (a) badly formed (all of them have the same full font name) and (b) CEWE does not supply an FG italic font!  
This resulted in our generated pdf inexplicably using FG bold italic where it should have used FG bold. I suspect an issue in the reportlabs font management. The "fix" is some improvement of loading of the fonts in our code (including better diagnostics) and to define the FranklinGothic font family by hand in cewe2pdf.ini, using the Windows FG italic font to take the place of the missing CEWE FG italic. But don't ask me why that fixes it.  
<https://github.com/bash0/cewe2pdf/issues/128>

FG Normal                      Arial  
FG Bold                        Arial Bold  
*FG Italic*                      *Arial Italic*  
*FG Bold Italic*              *Arial Bold Italic*  
  
Balloon Caps  
  
Harlow Solid Italic

The whole issue of "incomplete" font families is not clear. CEWE manages a full set of four from the single pecita.ttf font file, as shown below, while our code needs separate files for the four weights!

Pecita Book  
**Pecita Book bold**  
Pecita Book Italic  
**Pecita Book Bold Italic**

<https://github.com/bash0/cewe2pdf/issues/85>

A (downloaded) black clipart  
(clipart="1134365") with the colour  
changed to red #df1900

A black clipart (clipart="129188")  
14466-CLIP-EMBOSS-GD.xml with the colour  
changed to turquoise #54ddff. Tricky because fill is  
set to none and stroke is not set

The OpenType font .otf file problem: CEWE provides some fonts in OpenType files that we cannot handle. We try to fix that with a one-time conversion to ttf files. Here are some tests  
<https://github.com/bash0/cewe2pdf/issues/133>

CEWE Head  
*CEWE Head Italic*  
**CEWE Head Bold**  
*CEWE Head Bold Italic*

<https://github.com/bash0/cewe2pdf/issues/153>

This is the Crafty Girls font,  
downloaded from fonts.google.com.  
Does it get the right line spacing?  
Also when an explicit new line is  
used?

<https://github.com/bash0/cewe2pdf/issues/182>

Line spacing 1.2 is now honoured by our code with Arial Line spacing 1.3 is now honoured by our code. Line spacing 1.4 is now honoured by our code Line spacing 1.0 is now honoured by our code.	Line spacing 1.0 is now honoured by our code with Bodoni Line spacing 1.2 is now honoured by our code. Line spacing 1.3 is now honoured by our code. Line spacing 1.4 is now honoured by our code.
